Discover Polished Concrete...

Polished Concrete by TPS.

A dry, dust and VOC-free process in which new or old concrete is mechanically polished with progressively finer diamond abrasives resulting in a low maintenance, low cost, yet aesthetically pleasing long-term flooring solution.

Why Polished Concrete Is a Better Alternative To Other Flooring Materials:

It's Lower Total Cost

- One-time application – touch up high traffic areas in future if needed
- Polished areas can be put back into service immediately
- Up to 30% increase in ambient lighting

It's Lower Maintenance

- Dust free and DRY process
- Eliminates tire marks from fork trucks and part racks
- Reduces cleaning equipment consumables
- Dense surface inhibits oil, water, and other contaminants

It's Capital Improvement

- Highly reflective and pleasing aesthetic appearance
- Old, deteriorating, and weak concrete finishes are strengthened
- 40% more abrasion resistant
- 21% increase in impact resistance

It's Environmentally Friendly

- Environmentally friendly – no VOC's
- No coating of any kind is applied – including epoxy, urethane, or waxes
- No slurry or hazardous waste

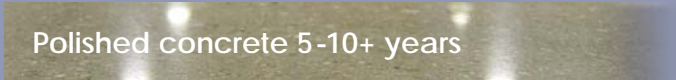

Life Cycle

Sealer 6-12 months

Epoxy 2-5 years

Polished concrete 5-10+ years

Applications

Polished Concrete works well anywhere there is a quality concrete substrate including manufacturing facilities, service centers, distribution centers, warehouses, assembly plants, airplane hangars, commercial outlets, department stores, offices, common areas, restaurants, showroom floors, laboratories, clean rooms, schools, cafeterias, and others.

Please note due to the natural materials involved, every slab of concrete will have unique characteristics, finish, and appearance.
